Summary

Front-End React/Next Developer committed to building intuitive, user-friendly web applications. Dedicated to developing efficient, responsive, and accessible solutions with modern web technologies and industry best practices, always focused on improving skills and delivering quality digital experiences.

Work Experience

E-Commerce Dec 2023 — Oct 2024

- built the entire front-end of a fully responsive E-Commerce website from scratch.
- Implemented advanced product navigation using Swiper sliders and dynamic product filters.
- Managed global state with Redux Toolkit, optimizing performance and reducing re-renders.
- Integrated internationalization (i18n) to support multiple languages.
- Developed a Progressive Web App (PWA) to enable offline access and mobile-like experience.
- Focused on pixel-perfect design, accessibility, and cross-browser compatibility.
- Ensured SEO best practices, lazy-loading, and performance optimization for fast loading times.
- Built reusable, clean, and scalable components following React best practices and modern CSS/SASS techniques.

Personal Note

I have social phobia, which affects my ability to engage comfortably in face-to-face or live interactions, including remote meetings. However, I excel in front-end development (especially React) and consistently deliver high-quality work. I work best in environments that emphasize written communication (e.g., chat, email, task boards), which allow me to focus deeply and contribute effectively. I'm seeking a role that supports this way of working so I can give my best without the added stress of direct social interactions.

Skills

Programming Languages

JavaScript es6+, HTML5, CSS3/SASS

Libraries & Tools

React.js, Next.js v15, React-Router-Dom v6, Swiper, React-Redux, Redux/Toolkit, Zustand, Recoil, Git, GitHub, Netlify, Vite, i18next, PWA

Relevant Skills

- Troubleshooting web applications
- Proficiency in CSS for drawing
- Basic understanding of UI/UX
- Pixel perfect design
- Responsive design
- Web performance optimization
- Attention to details
- Performance testing and debugging
- Search engine optimization (SEO)
- Clean code principles
- Cross-browser compatibility

Languages

- Arabic – Native language
- English – Proficient in writing, limited in speaking
