Summary

Front-End React/Next Developer committed to building intuitive, user-friendly web applications. Dedicated to developing efficient, responsive, and accessible solutions with modern web technologies and industry best practices, always focused on improving skills and delivering quality digital experiences.

Projects

E-Commerce Dec 2023 — Oct 2024

- built the entire front-end of a fully responsive E-Commerce website from scratch.
- Implemented advanced product navigation using Swiper sliders and dynamic product filters.
- Managed global state with Redux Toolkit, optimizing performance and reducing re-renders.
- Integrated internationalization (i18n) to support multiple languages.
- Developed a Progressive Web App (PWA) to enable offline access and mobile-like experience.
- Focused on pixel-perfect design, accessibility, and cross-browser compatibility.
- Ensured SEO best practices, lazy-loading, and performance optimization for fast loading times.
- Built reusable, clean, and scalable components following React best practices and modern CSS/SASS techniques.

Aster Information (Freelance Project) Aug 2023 — Nov 2024

- Project served as a freelance showcase; fully completed despite a pricing disagreement with the client.
- Built the entire front-end of a fully responsive single-page website (SPA) from scratch using React.
- Implemented smooth on-scroll animations and interactive UI elements to enhance user experience.
- Ensured SEO best practices, fast loading times, and full accessibility compliance across all devices.
- Focused on pixel-perfect design, clean layouts, and cross-browser compatibility.
- Optimized performance with lazy-loading and efficient rendering techniques.

Skills

Programming Languages

JavaScript es6+, TypeScript (Basic), HTML5, CSS3/SASS

Libraries & Tools

React.js, Next.js v15, React-Router-Dom v6, Swiper, React-Redux, Redux/Toolkit, Zustand, Recoil, Git, GitHub, Netlify, Vite, I18next, PWA

Relevant Skills

- Troubleshooting web applications
- Proficiency in CSS for drawing
- Basic understanding of UI/UX
- Pixel perfect design
- Responsive design
- Web performance optimization
- Attention to details
- Performance testing and debugging
- Search engine optimization (SEO)
- Clean code principles
- Cross-browser compatibility

Languages

- Arabic - Native language
- English - Proficient in writing, limited in speaking

Personal Note

I'm most productive in work environments that emphasize clear written communication, well-defined tasks, and minimal live meetings. This allows me to stay focused and deliver high-quality front-end solutions efficiently. I value deep work, attention to detail, and consistency in improving UI/UX and code quality. I'm looking for a role where I can contribute meaningfully while working in a calm and structured setting that supports async collaboration.
